Project Description	County will take steps to reduce the court-case backlog by hiring 3 additional District Attorney Office staff to increase speed of case resolution.
Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	The public health emergency caused the County's court system to drastically reduce capacity due to lack of social distancing ability. By adding staff to address the backlog of cases we hope to (1) reduce the delays in justice for victims, defendants, and the community, and (2) allow better delivery of services to crime victims, including those populations who have been historically underserved.
Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	The 3 additional staff are being hired for a 2-year term and we believe the backlog of court cases should be able to diminish down to pre-pandemic levels in that time.

Project Description	<p>The Public Health COVID-19 Communications program leads communications efforts to reach, educate, and inform those most impacted by the pandemic. In our county, the Latinx population was the most disproportionately impacted with about half of COVID cases occurring among this population even though people who identify as Latinx make up only 15 to 17% of the total population. Our communications efforts focused on creating materials to reach the Latinx and Spanish-speaking population along with our English speaking population. We also focused on populations that were more likely to get COVID because they lived in multi-generational housing, congregate living centers or because they were essential workers who didn't have the privilege of working from home during the pandemic.</p> <p>Because of ARPA funding we were able to hire a temporary bi-lingual/bi-cultural communicator to reach our Latinx/Spanish speaking population. We provided media interviews, created and updated COVID-19 pages in English and Spanish, created and updated COVID-19 web pages in English and Spanish, worked with community organizations to create shared vaccination education campaigns, created written materials in many languages, created comprehensive vaccination equity reports, and responded to community requests.</p> <p>These efforts have helped to reduce the disproportionate impact of the pandemic on our Latinx population, improved relationships with community-based organizations, and improved vaccine and testing access for community members who face language, economic, social, and other barriers.</p>
What Impacted and/or Disproportionally Impacted population does this project primarily serve?	1 Imp General Public
Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	To inform the general public and community about ongoing County efforts, requirements and announcements about COVID-19 public health issues.
Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	This covid-19 communication is in specific response to the public communication needs regarding covid-19.

Current Period Expenditures	\$84,819.01
Project Description	<p>Participants residing in encampments need targeted support to limit the exposure and spread of COVID-19 and other public health hazards among the unsheltered population. Further, case law and legislation has constrained how communities respond to homeless encampments on public land. Targeted support of participants residing in encampments includes regular trash collection, personal property management, sanitation services, outreach coordination, and when necessary, full encampment cleanups.</p> <p>The Encampment Management Program (EMP) utilizes staff from the Washington County Department of Health and Human Services, Washington County Housing Services, and Washington County Sheriff's Office to ensure a coordinated response to encampments. The EMP collects encampment reporting through a public portal on the Washington County website. The EMP launched in August 2021, serving encampments located in unincorporated Washington County. Washington County has encouraged city and special district partners to partner with the EMP to management encampments.</p>

Project Description	This project provides a range of housing support services necessary to assist older adults and persons with disabilities to improve their living conditions in the community. Individuals served by this project may be living in conditions that prevent the introduction of in-home services, and/or may be at-risk of being displaced from their current residence for a variety of reasons, and/or living in unsafe housing conditions. Intensive cleaning, also referred to as “muck-out,” is cleaning required to pass a landlord inspection or to remove an imminent health threat. Clients needing assistance may be evidencing hoarding behavior or squalor syndrome, which typically results in extreme clutter and/or unsanitary conditions.

Project Description	This project is focused on increasing access to support and assistance for unpaid family caregivers who have been impacted due to the pandemic's ongoing isolation and increased needs to those who are high-risk individuals. Support to caregivers is provided through the following activities: respite, counseling, support groups, and caregiver access assistance. Respite care offers temporary substitute supports to a care recipient to provide a brief period of relief or rest for the family caregiver. Counseling sessions provide support related to the complex physical, behavioral and emotional problems related to their caregiver roles. Support groups offer a facilitated discussion of common experiences, building a mutual support system.

Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	The activities under this project aim to increase access to supports and aid to unpaid family caregivers providing care to vulnerable adults and children in the home setting, which allows them to safely isolate to prevent further spread of COVID-19. This objective is accomplished by contracting with community-based organizations to offer additional respite, counseling, support groups, and access assistance services to family caregivers in our community.
Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	Family caregivers have been disproportionately impacted by the pandemic, as access to day programs, professional caregivers, and help from outside entities became scarce added to the increased risk of older adults and those living with chronic illness. We work with community partners, including Asian Health and Service Center and Centro Cultural on education and outreach regarding the Family Caregiver Support Program.

Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	Objectives of the team include informing policy development and planning processes for COVID-19, using data to inform long-term COVID-19 planning and resource allocation efforts, ensuring access to COVID-19 vaccination through education and connection to services, and informing COVID-19 prevention efforts, all with the intended outcomes of reducing the disease burden of COVID-19 in

Total Cumulative Obligations	\$92,655.29
Total Cumulative Expenditures	\$86,655.29
Current Period Obligations	\$52.57
Current Period Expenditures	\$19,052.47
Project Description	Aims to increase access to testing supplies and services for populations most at risk for COVID-19. Washington County continues to distribute the supply of Oregon Health Authority sourced rapid testing kits to culturally specific community-based organizations that serve people who may not be able to access a test otherwise, to those at highest risk, including people living in certain congregate care living settings, and to small businesses identified through direct assessment or consultation with the Business Resources Council. Expansion of transportation services to those needing rides to clinical sites that provide COVID-19 testing have also been made available this quarter.
What Impacted and/or Disproportionally Impacted population does this project primarily serve?	1 Imp General Public
Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	Objective to ensure access to COVID-19 testing for community members that are disproportionately impacted by COVID. We partnered with community-based organizations to support individuals that need access to testing kits or transport to testing sites
Brief description of recipient’s approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	Access to testing helps to support early detection of COVID-19, which allows community members to isolate and prevent further disease in the community. A positive test detected allows for earlier treatment, likely reducing disease severity or death

Total Cumulative Expenditures	\$1,183,801.93
Current Period Obligations	\$1,621,221.17
Current Period Expenditures	\$960,666.87
Project Description	The Washington County Vaccine Team provides and promotes access to COVID-19 vaccinations with a focus on individuals who are medically underserved in Washington Co communities. The program supports multiple CBOs in their vaccine outreach and engagement by linking vaccinators with CBO events. In addition, this quarter our program partnered with CBOs to administer vaccine at several events. The most successful event a CBO partner administered both catch up childhood vaccines and COVID vaccines. we saw a sizable uptake in pediatric COVID vaccinations administered. Expansion of homebased vaccine services continues as the team responded to 6-10 calls/day scheduling at home vaccinations to the aged, medically fragile, disabled and homebound.
What Impacted and/or Disproportionally Impacted population does this project primarily serve?	1 Imp General Public
Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	Objective is to partner with organizations, health centers and business partners and assure access to COVID-19 vaccinations to all eligible age groups in communities that are historically impacted by health inequities. We also strive to provide a convenient process for homebound vaccine requests from individuals and adult foster homes that struggle with vaccine access due to mental, behavioral or medical disabilities that impact their ability to leave home. We continue population data review
Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	It remains apparent that vaccine hesitancy remains a factor in a portion of the White, Black and Hispanic communities. Our health equity goals focus on Black and Hispanic populations that continue to be impacted by COVID-19 and historical health inequities. Though evidence based, the known premise that vaccinations prevent severe disease, hospitalizations and death is not always enough to counter the wave of misinformation and government mistrust in the BIPOC communities. Current Period Expenditures	\$893,707.77
Project Description	The Isolation and Quarantine Support (Wraparound Services) program connects people who are in isolation due to COVID-19 with a Community Health Worker (CHW) from a culturally specific Community-Based Organization (CBO). The CHW supports the person or family who is isolating due to a positive COVID-19 test by arranging food delivery, accessing funds to pay rent or mortgage and utilities. The CHW also supports the person or family by helping navigate other resources that support health and mental well-being. The funding for wraparound services has been vital to support people being able to stay home during their infectious period which prevents the spread of COVID-19 in our community.
What Impacted and/or Disproportionally Impacted population does this project primarily serve?	4 Imp HHs that experienced increased food or housing insecurity
Secondary Impacted and/or Disproportionately Impacted populations	14 Dis Imp Low income HHs and populations
Tertiary Impacted and/or Disproportionately Impacted populations	16 Dis Imp HHs that qualify for certain federal programs
Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced	The objective of the Wraparound Services program is to support individuals and families to safely isolate after a positive COVID-19 through resource navigation and direct assistance with grocery delivery, rent/mortgage payments, and utility payments. Washington County contracts with five CBOs to provide culturally and linguistically responsive support to mitigate the financial impact of isolation and prevent the spread of COVID –19 in the community.
Brief description of recipient’s approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19	The Wraparound Services program provides support to people and families who are isolating after receiving a positive test for COVID-19. The program is designed to serve disproportionately impacted communities and primarily serves people with low incomes who need support staying in their homes during their isolation period. Due to systemic racism and structural inequities, Black, Indigenous, Latinx and other communities of color have been impacted by the pandemic at great magnitude. Many people f
