About Access to Care

- ▶ Currently focusing on developing a charter
 - Aim: Demonstrate connection between subcommittee goals and overarching Access to Care goals.
- ▶ Thinking through how to operationalize Equity and Trauma Informed Care in the charter.

The CHIP Equity and Trauma Informed Toolkit

- ▶ How to integrate Equity and Trauma Informed Care?
 - Goal: Moving from concepts to practices
 - Use of CHIP Toolkit, debuted at CHIP Forum in January
 - Toolkit includes:
 - Definitions and Principles of Trauma Informed Care and Equity
 - Meeting Guidelines
 - Decision Making Models
 - Charter Templates
 - Work Plan Template
 - Membership Commitment Forms

Operationalization

- ▶ Use of the toolkit for charter development
 - Decision Making Guides
 - Ground Rules/Group Norms
 - Membership Commitment Forms

Why This Matters

- ▶ It can be overwhelming to think about organizational change.
- ▶ Development of the workplan with these principles demonstrates how organizational change can be broken into smaller components.
- ▶ Will result in a more equitable and accessible approach to increasing access to care in Washington County.
