Testing and Outcomes by County

### Oregon's COVID-19 Testing and Outcomes by County

This map shows the number of COVID-19 cases per 10,000 people by county in Oregon.\*The number of cases in a community depends, in part, on the number of people who live there. These rates help us compare counties of different sizes more evenly than total case counts alone. Hover over a county in the map below to see the total number of cases, recovered cases, deaths, and positive and negative tests in that county. The table summarizes this information as rates and percentages for all counties.

	Case Count per 10,000	Deaths (%)	Recovered Cases (%)	Positive Tests (%)	Negative Tests (%)	Test Count per 10,000
Statewide Total	10.8	4%	49%	3%	97%	337.8
Marion	29.6	3%	36%	9%	91%	333.3
Jefferson	23.1	0%	40%	4%	96%	476.1
Umatilla	15.4	2%	86%	6%	94%	243.7
Multnomah	15.0	5%	39%	4%	96%	371.4
Hood River	14.5	0%	19%	2%	98%	531.9
Washington	12.6	2%	57%	4%	96%	324.1
Polk	12.1	12%	70%	5%	95%	255.1
Wasco	11.7	3%	53%	2%	98%	531.6
Clatsop	11.4	0%	18%	3%	97%	436.3
Malheur	10.3	0%	61%	4%	96%	250.1
Linn	9.8	7%	60%	3%	97%	365.8
Morrow	9.5	0%	58%	6%	94%	160.1
Clackamas	8.0	4%	50%	2%	98%	315.8
Yamhill	7.3	9%	56%	2%	98%	305.8
Deschutes	6.9	0%	84%	2%	98%	328.9
Klamath	6.6	0%	82%	1%	99%	551.3

Notes

\*Rates shown on this dashboard are calculated using population estimates from the 2019 Annual Population Report from Portland State University's College of Urban & Public Affairs: Population Research Center. For our calculations, we round population numbers to the nearest whole number, resulting in slight variation from the numbers in that report (within +/- 4 persons).

COVID-19 data are provisional and subject to change.

## Oregon's Public Health and COVID-19 Indicators by County

OHA is monitoring six indicators that measure the health burden of COVID-19 in each Oregon county and the capacity of the county to respond. Together, these are the health signs we consider when we make recommendations about counties reopening or stopping, watching, and redirecting. Although these indicators overlap with some of the Governor's Reopening Criteria, they are only one part of that larger framework.

These public health indicators help inform our recommendations, but do not reflect final decisions about a county's reopening status. We look at these indicators in context to one another and to other information. If a county does not meet any one indicator, this does not define final decisions for reopening this county. This page shows the status of Oregon counties for each public health indicator. Click on a county in the map to filter the table below.

[View the Governor's Reopening Criteria](#)

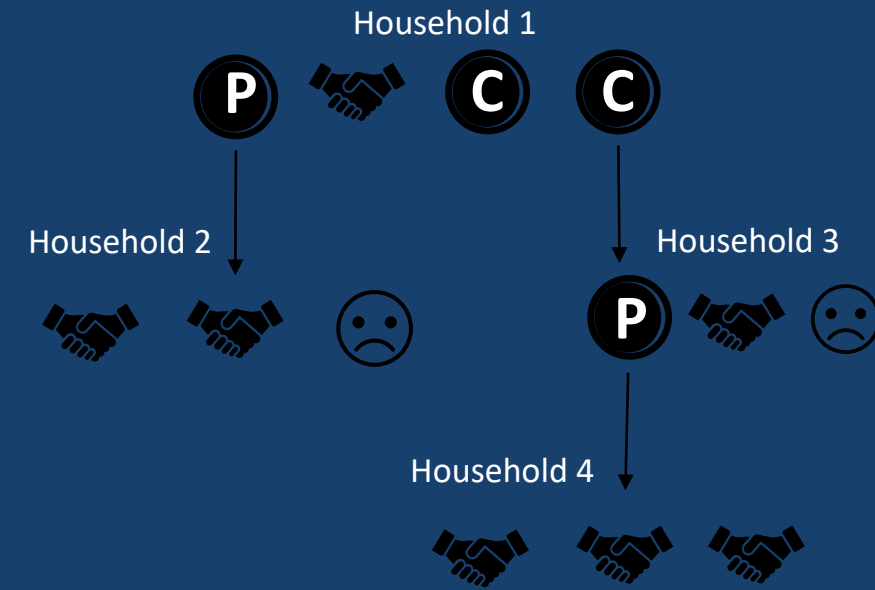

■ Does not meet one or more indicators ■ Meets all indicators

### Public health indicators for monitoring COVID-19 in Oregon's counties

This table summarizes the indicators OHA is monitoring for making public health recommendations at the county level. A ✓ means the indicator is met by the county, a ✗ means the indicator is not met by the county, and a • means the indicator is not applied to that county, due to small numbers of COVID-19 cases.

County	% ED visits for COVID-like illness is below 1.5%*	Percent of tests that result positive does not trend up in last 7 days	New cases do not increase more than 5% in last 7 days	New cases not traced to a known source is below 30% for last 7 days	COVID-19 hospital admissions decline over the last 14 days	Follow up initiated within 24 hours for 95% or more of cases in last 7 days
Polk	0.5% ✓	Downtrend ✓	33% ✗	25% •	Downtrend ✓	100% •
Sherman	0.5% ✓	•	•	•	•	•

# Contact Tracing explained

Confirmed case - isolation

Presumptive case - isolation

Close contact – active monitoring

COVID symptoms – refer for testing

# Contact tracing data by ethnicity

Epi-linked cases

Hispanic/Latinx: 33% sporadic, 38% Household

Non-Hispanic: 48% sporadic, 20% Household
