Additional Homeless Populations Summary for OR-506 - Hillsboro, Beaverton/Washington County CoC

Date of PIT Count: 1/26/2022

Population: Sheltered and Unsheltered Count

Other Homeless Subpopulations

	Sheltered			Unsheltered	Total
	Emergency	Transitional	Safe Haven		
Adults with a Serious Mental Illness	42	2	0	65	109
Adults with a Substance Use Disorder	11	1	0	55	67
Adults with HIV/AIDS	0	0	0	5	5
Adult Survivors of Domestic Violence	39	4	0	15	58

Methodology for OR-506 - Hillsboro, Beaverton/Washington County CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	100%
Provider-level surveys	0%
Client-level surveys	0%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in emergency shelter capacity

Please provide a brief description of these specific factors (500 word limit):

Sheltered population increased to 581 people in 2022, as compared to 359 people in 2021.

CHANGE IN EMERGENCY SHELTER CAPACITY: 496 emergency shelter beds operated as compared to 345 emergency shelter beds in 2021. This included 104 new year-round shelter beds leveraging a new Supportive Housing Services (SHS) local option levy and increased winter shelter beds providing a total of 275 seasonal beds.

CHANGE IN PARTICIPATION OF PROGRAMS DUE TO COVID-19: In response to the highly contagious Delta variant of COVID-19, facility-based shelters and transitional housing with common areas (e.g. shared restrooms, kitchen and living areas) reduced the number of occupants in the program. In addition, participants in the program were less likely to engage in shelter if they shared bedrooms given the risk of COVID transmission.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - complete census

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)

- Blitz count of unsheltered people (i.e., canvassing of different areas occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count
- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., “service-based” surveys at locations where people who are homeless go for assistance)

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Blitz count of unsheltered people (i.e., sheltered and unsheltered counts occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in participation of programs serving general homeless populations (e.g., singles, families)
- Change in rapid re-housing capacity
- Change in other supportive housing subsidy capacity

Please provide a brief description of these specific factors (500 word limit):

Unsheltered population decreased to 297 people in 2022, as compared to 357 people in 2021. **CHANGE IN PARTICIPATION OF PROGRAMS SERVING GENERAL HOMELESS POPULATIONS (E.G. SINGLES & FAMILIES):** In 2020 the CoC implemented a national Community Solutions initiative – Built For Zero – that included expanding outreach programs to provide geographic coverage and develop relationships with the unhoused population. In 2021, this initiative supported the transition of high-acuity chronicity unhoused people to transition from encampments to shelter and housing. The PIT unsheltered count included outreach and peer support staffing that performed Wellness Checks, provided information on COVID symptoms, testing and vaccination availability, and collected demographic data.

CHANGE IN RAPID RE-HOUSING CAPACITY: The COVID-19 CARES Act ESG-CV1/2 funded 144 beds of rapid rehousing providing new rent subsidy assistance that reduced the number of unsheltered people.

CHANGE IN OTHER SUPPORTIVE HOUSING SUBSIDY CAPACITY: The Housing Authority leased new Emergency Housing Vouchers (EHV) in alignment with the CoC coordinated entry with 58 beds occupied, and the local SHS levy added capacity with 470 beds leasing and 300 beds under-development.
