WHY 121st AVENUE?

Currently, SW 121st Avenue, in the city of Tigard, has two travel lanes, limited street lighting, no bike lanes, intermittent sidewalks, and inadequate drainage facilities. This roadway section is adjacent to densely populated residential neighborhoods.

This project would improve the roadway to current city standards and provide for more safe pedestrian and bicycle use along the roadway.

The city is adding public works funds for a water line replacement in a section of the project area.
