

Road Classifications

Local:

Lowest traffic and lowest speed road; provides access to a neighborhood or business, connecting to neighborhood routes and collectors.

Neighborhood Route:

Residential streets in urban neighborhoods that connect to nearby collectors.

Collector:

"Collects" traffic from adjacent local roads, connecting to arterials or community centers.

Arterial:

Primarily for through traffic; usually a continuous route linking principal arterials with major employment centers and other designations.

Principal Arterial:

High-traffic, long roads such as freeways and highways that often travel through different jurisdictions.
