

FARMINGTON ROAD CORRIDOR PLAN GOALS AND OBJECTIVES

GOAL	OBJECTIVE
SAFETY	Reduce the potential severity and number of crashes on Farmington Rd.
	Reduce the potential severity and number of crashes involving people walking, biking or rolling along or across Farmington Rd.
NATURAL ENVIRONMENT	Improve the built or natural environment and climate resiliency with upgrades like enhanced stormwater treatment, wetlands, or other options.
	Minimize environmental impacts.
ECONOMIC VITALITY	Increase travel reliability for all travelers.
	Facilitate the safe and efficient movement of freight, including agricultural and forest products.
	Facilitate a multimodal transportation system that increases access to opportunity (e.g. jobs, school, etc.).
	Minimize impacts to existing land uses.
LIVABILITY/ HEALTH/EQUITY	Include design elements that increase active modes of transportation for all users and abilities.
	Increase access for people walking, biking or rolling to community destinations, including schools, transit stops, parks and recreation facilities, and employment areas.
	Provide equitable access for transportation disadvantaged populations which have historically been underserved in this corridor.
FEASIBILITY	Identify a feasible solution that can be easily maintained.
	Consider expected costs, funding sources, environmental impacts, right-of-way, and permitting.
