

Timber Road Bridge @ Gales Creek

About

The Timber Road bridge over Gales Creek (north of Highway 6) is substandard due to its narrow lanes and showing signs of wear. It was constructed in 1936.

This project will replace the old bridge with a new wider concrete structure. Temporary traffic signals will be installed to control traffic to cross over the bridge one direction at a time during construction

The \$2.06 million bridge replacement project is funded through of the Major Streets Transportation Improvement Program (MSTIP) Phase 3d.

CPO 13, Commissioner District 4
