### Notes:

Fran Warren discussed the program Treekeepers of Washington County. She talked about the goals and volunteer opportunities in the county related to trees and the helpful information and training kits they provide such as around the invasive ash borer. There was also a good discussion around land use laws and trees in urban areas and how Washington County has never adopted or much interest in adopting a tree code. Treekeepers of WashCo is also working on a tree mapping project. For more information check out their website
