

FY 2022-23 Budget Questions**Service District for Lighting Budget**

Question #	Question	Answer
1	What is the correct process for reporting a light out in my SDL No. 1 District?	If a streetlight needs repair, look for a metal PGE tag on the pole. Note the pole and map numbers and submit a repair request directly to PGE. If you do not find a tag, call 503-464-7777 or report it online to PGE. You can also report any road concern through the Land Use & Transportation (LUT) wcr.roads.com website using the "Request a Service" feature. If a light is not the responsibility of LUT staff, they will forward the request to PGE or the appropriate agency.
